Project Submission Announcement

Please read the following instructions carefully before submitting your project:

1. Fill out the submission form with correct and complete information.
2. You are required to submit the following details:
 - Your project GitHub repository link
 - Your project live link, hosted on Vercel
 - Project Explanation .You must write a detailed project explanation in the description section.
 - The explanation must include:
 - How the project was built, the approach/logic used, and the technologies involved.
 - Total time taken to complete the project.
 - How much help you took from AI tools
 - You are allowed to make changes to your project only until 24 January 2026, 12:00 AM.
 - After this time, no commits, pushes, or changes should be made to your GitHub repository.
 - If any commit or push is found after the deadline, your project will be rejected immediately.
 - Failure to follow any of the above instructions may result in rejection of the project submission.

Note:- Make sure to deploy your project carefully and test everything properly so that there are no issues after submission. If you face any problem during deployment, feel free to connect with the mentors
